## 2020 SELECT FORMULARY UPDATES

EnvisionRx's formulary management strategy ensures patients have access to the medications they need at the lowest possible cost. As part of that approach, our formulary updates (new/updated exclusions, step therapy, preferred and non-preferred status, and prior authorizations) to the 2020 Select Formulary are outlined in the following tables. All new exclusions and non-preferred products have preferred formulary alternatives which treat the same condition. We will communicate directly with any impacted members. Our experience shows that informative communications educate and empower members and drive satisfaction.

### **NO ACTION REQUIRED**

This document contains detailed information on formulary exclusions, step therapy, tiering changes and prior authorization additions effective January 1, 2020. Note that while the majority of formulary changes occur for 1/1, changes to your formulary may occur mid-year. Contact your Account Manager with any questions.
