Appendix II HCP Development Permit Master List Through 2024 (19th Annual Reporting Period)

INTRODUCTION

Efforts to address the development impacts on the habitat of the endangered Key deer, the Lower Keys marsh rabbit, and the threatened eastern indigo snake on Big Pine Key and No Name Key, began in the mid-1980s. In 1998, Monroe County (County), the Florida Department of Transportation, and the Florida Department of Community Affairs signed a Memorandum of Agreement in which they committed to develop a Habitat Conservation Plan (HCP) in accordance with Section 10(2)(A) of the Endangered Species Act for these two Keys. In order to determine community needs, the County also carried out a planning effort called the “Livable CommuniKeys Plan” (LCP) that was based on community participation and carried out concurrently with the HCP. The County initiated the LCP in April 2000 and adopted the Master Plan for Future Development of Big Pine Key and No Name Key in December 2004.

The HCP, together with the LCP for Big Pine Key and No Name Key, provide the basis of a Master Growth Management Plan for development on Big Pine Key and No Name Key. It satisfies the functional and recreational needs of a rural community while maintaining the long-term viability of covered species and their habitat. The HCP provides for minimization and mitigation of incidental take by regulating development and acquisition activities. The goals of the HCP are to ensure that future development activity does not have a negative effect on Key deer, Lower Keys marsh rabbit, and eastern indigo snake populations. The federal Incidental Take Permit (ITP), TE083411-0, is the accompanying regulatory document to the HCP. The ITP originally had a 20-year lifespan from June 9, 2003 through June 30, 2023, but has been extended through June 30, 2026 by permit ESPER0039939. To account for development activities authorized prior to the adoption of the LCP, impacts and land acquisitions are included for the period from March 13, 1995 to June 8, 2006. The initial monitoring year is the period from the effective date of the ITP, June 9, 2006, to the end of the same calendar year (December 31, 2006). Items in the cumulative data counts over the 23-year period include numbers of County-acquired parcels, fence permits, single family residential development, and commercial development.

This document constitutes the *19th Annual Monitoring Report on the Habitat Conservation Plan for the Key Deer and Other Protected Species*, a report that Monroe County prepares annually and presents to the U.S. Fish and Wildlife Service (USFWS or Service) to fulfill the requirements of the ITP. The current document provides an account of development and acquisition activities from March 13, 1995 through December 31, 2024 and includes the balance of the H-values debited by development activities, as well as those credited by acquisitions, dedications, and conservation activities.

I. **2024 KEY DEER INDEX**

Results of the Key deer abundance indices, including the calculation of the average number of deer seen.

The Key deer road-count index value is the average count from multiple road-count surveys throughout the year on Big Pine Key and No Name Key. It has also been referred to as the Key deer “census,” “road count,” and “count index”; these labels are often used interchangeably. The road counts have previously been conducted once to bi-monthly with a single sunset survey, but

the survey methodology was modified in response to stochastic events requiring a more intensive survey regimen to assess potential effects to the Key deer population. These intensive surveys were also used to estimate population size on the core islands (Big Pine and No Name Keys) as well as estimate Key deer mortality after Hurricane Irma struck the Lower Florida Keys on September 10, 2017.

Because of staffing insufficiency at the Refuge, no data was available from 2019 through 2024. Following is the data that was available for prior reporting years:

Table 1. Summary of Key deer counts during road surveys and averages for 2010-2024.

Year	Period Covered by Surveys	Survey Method	Number of Surveys	Average Deer Count
2010	January - December	Monthly sunset	10	57
2011	January - December	Monthly sunset	11	61
2012	January - December	Monthly sunset	10	59
2013	January - December	Bi-monthly sunset	5	68
2014	January - December	Bi-monthly sunset	6	67
2015	January - December	Bi-monthly sunset	5	52
2016	January - September	Bi-monthly sunset	5	54
2016	October - December (Screwworm Incident)	Intensive sunrise/sunset	26	53
2017	January - August	Intensive sunrise/sunset	45	97
2017	September –November (Post-Hurricane)	Intensive sunrise/sunset	29	43
2018	January-March 1 st	Intensive sunrise/sunset	16	43
2018	March 5 th -December	Intensive sunset	57	37
2019	No data available because of staffing insufficiency at the Refuge			
2020	No data available because of staffing insufficiency at the Refuge			
2021	No data available because of staffing insufficiency at the Refuge			
2022	No data available because of staffing insufficiency at the Refuge			
2023	No data available because of staffing insufficiency at the Refuge			
2024	No data available because of staffing insufficiency at the Refuge			

II. KEY DEER MORTALITY SUMMARY

A summary of Key deer mortality information, including the calculation of the number of human-related deaths.

Another dataset collected on the Key deer population is the mortality index for the core area, *i.e.*, the number of deer deaths reported on Big Pine and No Name Keys.

The total mortality count on Big Pine and No Name Keys from January 1, 2024 to December 31, 2024 was 170. Of these reported deaths, 125 (74%) were attributed to deer-vehicle collisions (DVC). Three (2%) of the deaths were attributed to human-involved (anthropogenic) causes other than motor vehicles such as poaching, entanglement, and dog attacks, bringing the total number of Key deer deaths related to human activities to 128 (75%). Deaths from natural causes such as drowning, combat-inflicted injury, and disease accounted for 13 (8%) of reported deaths. The remaining 29 (17%) of Key deer deaths reported were assigned an undetermined cause due to lack of physical evidence identifying the cause of death.

Table 2. Summary of Key deer deaths by cause reported from 2010 - 2024 for Big Pine and No Name Keys, including Little Palm Key and Big Munson Key.

YEAR	CAUSE OF DEATH											TOTAL
	COMBAT	DISEASE	DOG	DROWNING	ENTANGLEMENT	HUMAN	POACHED	DVC	UNKNOWN	NW SW	IRMA	
2010	1	7	0	7	3	0	0	103	20			141
2011	2	12	6	3	3	2	0	131	16			175
2012	4	17	2	3	5	0	0	151	15			197
2013	0	8	0	5	2	0	0	109	27			151
2014	0	3	3	5	1	0	1	121	13			147
2015	1	6	1	2	2	0	4	85	13			114
2016	0*	8	0	4	3	3	4	109	24	131		286
2017	0	4	1	5	4	1	0	113	23	2	21	174
2018	0	0	1	1	1	3	2	52	16	0	0	76
2019**	0	1	0	0	0	1	0	40	10	0	0	52
2020	2	6	0	0	2	0	0	54	12	0	0	76
2021	1	5	0	3	1	0	0	57	9	0	0	76
2022***	2	3	0	2	1	1	0	47	11	0	0	67
2023	0	5	2	7	2	2	0	131	39	0	0	188
2024	0	5	1	8	2	0	0	125	29	0	0	170

DVC= Deer- Vehicle Collision

NW SW = New World Screwworm

* *Screwworm infestation and fatalities occurred primarily in adult males during the fall of 2016.*

** *Due to limited staffing since 2019 and the late creation of the Refuge's online reporting tool in June 2019, the reported 2019 mortality numbers are limited. In addition, there could be discrepancies in reporting as the Refuge relies heavily on the Florida Fish and Wildlife Conservation Commission to report each incident in which they respond.*

*** *2022 data is incomplete and does not include data for August or September of 2022.*

III. KEY DEER INDEX AND MORTALITY DATA DISCUSSION

A discussion and interpretation of census and mortality data.

Because of staffing insufficiency at the Refuge, no data was available from 2019 through 2024. Following is the data that was available for prior reporting years:

The Key deer population has experienced stochastic events (New World Screw Worm, Hurricane Irma) since 2016, which has prompted a change in the intensity of survey efforts to monitor the population. These intensive surveys returned higher values for average deer counts than past surveys, given the increased frequency and number of observers. Average deer counts in the past have represented only the deer seen during sunset surveys, and while adequate for rough estimation of current population trends, it was determined by Key deer researchers that additional effort was

needed to understand the impacts of these events on the population. The increased effort in surveying during this time caused variation in the count index dataset. This variation is visible in the increased deer counts due to the number of observers used for surveys during this time. Utilizing trends in key deer count data still provides valuable information on the general abundance of deer, as well as additional data used by experts to calculate population sizes and estimate mortality.

In response to the 2016 screwworm incident and Hurricane Irma in 2017, the Service funded Texas A&M to conduct a Key deer population estimate survey in March of 2020. The Service received the final report from Texas A&M in early 2021. The results of the survey estimated the overall population of the Key deer herd was approximately 750 individuals, which suggests that given sufficient time and appropriate habitat management, the Key deer population has had the opportunity to be on the rebound from the post Hurricane Irma estimates of approximately 575 individuals.

IV. SUMMARY OF HABITAT MANAGEMENT ACTIVITIES

The Monroe County Land Steward is responsible for managing all of the County's conservation lands, including the County's mitigation properties on Big Pine and No Name Keys. Over the past year, the Land Steward, with the assistance of the Assistant Land Stewards, the County's contracted crew of invasive exotic plant technicians, and other contractors, has conducted numerous invasive exotic plant removal projects, site cleanup projects, and native plantings on County mitigation properties.

V. KEY DEER MORTALITY RATIO

An assessment of the ratio of the number of anthropogenic (human-caused) deaths to the average number of deer seen.

Because of staffing insufficiency at the Refuge, no survey data was available from 2019 through 2024. Following is the data that was available for prior reporting years:

In 2018, the ratio of human-related deaths to the average number of deer seen was 1.03. This value was obtained with the value from the total surveys conducted in 2018. This value has not been calculated since 2018 due to staffing shortages at the Refuge from 2019 through 2024, however the last reported value from 2018 falls below the upper boundary of the 95% confidence interval (1.53) defined in the county HCP.

Table 3. Ratio of anthropogenic (human-related) deaths to average deer count for entire years surveys.

Year	Anthropogenic Deaths	Average Deer Seen	Ratio
2010	113	57	1.98
2011	145	61	2.38
2012	161	57	2.82
2013	116	68	1.71
2014	131	67	1.96
2015	84	52	1.62
2016	119	53	2.25
2017	101	76	1.33
2018	39	38	1.03
2019	41*	Unavailable**	Unavailable
2020	56	Unavailable**	Unavailable
2021	58	Unavailable**	Unavailable
2022	49***	Unavailable**	Unavailable
2023	137	Unavailable**	Unavailable
2024	128	Unavailable**	Unavailable

* 2019 mortality data is incomplete and only represents data collected between June 10, 2019 and December 31, 2019.

** Because of staffing insufficiency at the Refuge, 2019 through 2024 survey data is unavailable.

*** 2022 mortality data is incomplete and does not include data for August of 2022 nor September of 2022.

VI. ANNUAL IMPACTS TO LOWER KEYS MARSH RABBIT HABITAT 500-METER BUFFERS (January 1, 2024 – December 31, 2024)

Item G 20 of the ITP stipulates: “No development will be allowed in Lower Keys marsh rabbit habitat. No residential or commercial development will be allowed within 500 meters of marsh rabbit habitat, with the exception of isolated areas (i.e., the green-hatched areas on HCP Figure 2.2).”

For Reporting Year 19, a total of two development permits were issued for parcels in the Lower Keys marsh rabbit (LKMR) 500-meter habitat buffers (Table 4). One development permit was for a new residential structure within the habitat buffer located in the green-hatched subareas illustrated on Figure 2.2 of the HCP; these are areas within the buffers wherein the ITP allows development due to the presence of canals and other barriers to the species. The other development permit was for a new residential structure located partially within the habitat buffer outside of the green-hatched subareas, but the Service indicated via email that they did not object to the issuance of a development permit for that site; though the property appears to be only partially located within the habitat buffer, the square footage of the entire site was included for calculation purposes. The issued permits resulted in an area of 0.34 acres affecting the LKMR habitat 500-meter habitat buffers. (Table 4).

Table 4. Development impacts for 2024 to Lower Keys marsh rabbit habitat 500-meter buffers.

2024 DEVELOPMENT IMPACTS TO LKMR HABITAT BUFFER				
REAL ESTATE NUMBER	PERMIT NUMBER	ISSUE DATE	LAND USE DEVELOPMENT TYPE	IMPACTS (ACRES)
00111880-000205	10103101	03/13/24	SFR	0.172
00249270-000000	SFDUP-2022-0077	05/29/24	SFR	0.172
TOTAL AREA IMPACTED (ACRES)				0.344

VII. CUMULATIVE IMPACTS TO LOWER KEYS MARSH RABBIT HABITAT 500-METER BUFFERS

Since 2003, the cumulative impact of all development projects affecting buffer areas for the LKMR through 2024 is 57.84 acres. Approximately 25 acres of these impacts occurred prior to the issuance of the ITP; cumulative impacts to the LKMR buffer since permit issuance (June 9, 2006) are 32.58 acres. The 2.01-acre impact for the National Key Deer Refuge visitor center was removed from the cumulative total in 2025 since federal development activities are not covered by the HCP.

VIII. LOWER KEYS MARSH RABBIT ROAD MORTALITY

A summary of reported Lower Keys marsh rabbit road mortality.

No mortality was reported for the Lower Keys Marsh Rabbit during 2024.

IX. CUMULATIVE IMPACTS TO PROJECT AREA SINCE PERMIT ISSUANCE (6/9/2006)

**The new National Key Deer Refuge visitor center did not require a permit from Monroe County. The acreage of the project area for the visitor center is included in this table, but the H_{impact} for “Institutional” land use is not included in the HCP Development Permit Master List (Appendix II).*

***Redevelopment from prior use.*

****Reissue or revision of prior permit.*

X. DEVELOPMENT ACTIVITIES

The H_{impact} for Reporting Year 19, from January 1, 2024 to December 31, 2024, is 0.0070. The cumulative H-impact of all development activities between March 13, 1995 and December 31, 2024 is 0.5736 (see Appendix II).

The following tables detail the H_{impact} for different permit types for the current reporting year.

2024 SINGLE FAMILY RESIDENTIAL (SFR) PERMIT H-IMPACTS						
RE Number	Permit No.	Permit Issue Date	Parcel H	H Impact	Tier	Permit Type
00111880-000205	10103101	03/13/24	0.0007	0.0007	3	SFR

XI. H-VALUE ASSOCIATED WITH DEVELOPMENT JANUARY 1, 2024 THROUGH DECEMBER 31, 2024

H-VALUE SUMMARY FOR REPORTING YEAR 19 (2024)							
Reporting Year 18	H impact	H mitigation	No. of SFR Permits	No. of new SFR Permits in Tier 1	Tier 1 new SFR H	Native Habitat (acres)	Rabbit Buffer (acres)
1/1/2024 - 12/31/2024	0.0070	0	4	0	0	0	0.34

XII. CUMULATIVE H-VALUE FOR ALL DEVELOPMENT

In 2025, a review of Tier 1 development permits discovered several projects that had inadvertently been included as new development with previously reported H_{impact} even though they were replacements or redevelopment, as well as the construction of the National Key Deer Refuge visitor center, which was a federal development activity not covered by the HCP. There

was also one development permit discovered with H_{impact} previously entered as text instead of numbers. Corrections were made to the master list and cumulative data resulting in the reduction in H-value of 0.0585 from the cumulative H_{impact} totals. The total H_{impact} for all time periods is 0.5736 “H” (See Appendix II).

**Includes road widening and paving*

XIII. CONSTRUCTION OBSERVATIONS

The permittees made no observations of direct or incidental take of Key deer during construction monitoring of County facilities and road expansion activities.

XIV. ACQUISITIONS THROUGH DECEMBER 31, 2024

A total of 1,447 parcels comprise the mitigation lands on both Big Pine Key and No Name Key under the Habitat Conservation Plan. These lands are managed by the Monroe County Land Steward and, in some instances, staff of the National Key Deer Refuge.

A routine audit of the master list data in 2025 discovered two parcels with H-values previously entered as text instead of numbers. Corrections were made to the master list spreadsheet and cumulative data resulting in an increase in H-value of 0.0020 to the cumulative acquisition totals.

March 13, 1995 – December 31, 2024

For the reporting period of March 13, 1995 through December 31, 2024 (the end of Reporting Year 19), Monroe County acquired parcels with a total H-value of 3.2782 “H”.

XV. ACQUISITIONS FOR 2024

January 1, 2024 – December 31, 2024

During Reporting Year 19, Monroe County reported acquisition of 0 parcels with a total “H” of 0.0000.

XVI. CUMULATIVE “H” ACQUIRED

Total cumulative “H” mitigation credit acquired through 2024 (Reporting Year 19) is 3.2782. The cumulative “H” mitigation credit acquired to date (3.2782) is 99.3% of the 3.3 mitigation “H” required for the maximum allowable H-impact of 1.1.

XVII. MANAGEMENT ACTIVITIES CONDUCTED FROM JANUARY 1, 2024 TO DECEMBER 31, 2024

The Monroe County Land Steward is responsible for managing all of the County’s conservation lands, including the County’s mitigation properties on Big Pine and No Name Keys. Over the past year, the Land Steward, with the assistance of the Assistant Land Stewards, the County’s contracted crew of invasive exotic plant technicians, other County contractors, and the County’s Solid Waste Department, has conducted numerous invasive exotic plant removal projects, site cleanup projects, and native plantings on County mitigation properties.

XVIII. ASSESSMENT OF ALL MITIGATION PARCELS

There are 1,447 mitigation parcels on Big Pine and No Name Keys. Many of these parcels are individual lots within developed subdivisions. This situation creates a large amount of edge between developed parcels and the subject mitigation lands. The edge effects include the constant threat of invasive exotic plant invasion and the potential for dumping and encroachment by neighboring residents. The Monroe County Land Steward and the Assistant Land Stewards are working to address these management issues by conducting invasive exotic plant removal projects

(with the assistance of the County’s contracted crew of invasive exotic plant technicians and other independent contractors), notifying residents of encroachment issues, and working with the Monroe County Solid Waste Department to clean up dumped debris. Additionally, the Land Steward has created an informational brochure for homeowners, which provides information regarding invasive exotic plant species, native plants, and the proper disposal of landscape debris.

XIX. EXOTIC / NUISANCE PLANT CONTROL PROGRAM MONITORING REPORT

Site visits were conducted and aerial photo interpretation was used to determine the level of infestation of invasive exotic vegetation. For the purposes of this report, an “invasive exotic plant” is one that is listed on the Florida Invasive Species Council’s list as either a Category I or a Category II species. A total of 14 parcels were found to have invasive exotic infestation level greater than 10 percent aerial coverage. These parcels comprise approximately 1.0 percent of the total number of parcels (1,447).

Monroe County continues to make progress on the eradication of exotics throughout the Big Pine and No Name Key area. Large scale invasive exotic removal projects are followed by site cleanup and native vegetation planting, as needed. Additional invasive exotic removal projects are planned for the coming years, subject to available funding.

The Monroe County Land Steward and the Assistant Land Stewards, with the assistance of independent contractors, continues to monitor and treat invasive exotic plant species on Monroe County Mitigation Lands.

Please see the attached “Invasive Exotic Vegetation Status Report” for additional information.

XX. MITIGATION CONFIRMATION STATEMENT

3:1 H-mitigation to impact ratio

- The cumulative H-value of lands acquired as mitigation since March 13, 1995 through the end of the reporting period, December 31, 2024, is 3.2782 “H”.
- The cumulative H_{impact} of parcels impacted by development activities since March 13, 1995 through the end of the reporting period, December 31, 2024 is 0.5736 “H”.
- The ratio of mitigation “H” (acquired lands) to H_{impact} (from development activities) is:
 $3.2782/0.5736 = 5.72:1$ “H”.

5% lag in meeting mitigation requirements

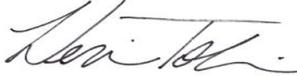

H_{impact} : = 0.5736
Mitigation required ($H_{\text{impact}} \times 3$): = 1.7208
Mitigation provided: = 3.2782

Percent of required mitigation provided: 191%

The permittees are not lagging behind the required 3:1 H-mitigation-to-impact ratio by more than 5%.

Statement of confirmation

The permittees confirm that mitigation as of December 31, 2024 is sufficient to maintain a 3:1 H-mitigation-to-impact ratio with respect to development activities. The calculations above demonstrate that the cumulative H-value of lands acquired to mitigate the cumulative H_{impact} through the reporting period is not less than the required minimum five percent.

Devin Tolpin, Senior Director of Planning and Environmental Resources

XXI. OTHER PERTINENT INFORMATION

New residential development in Tier 1 areas:

The Incidental Take Permit allows development of ten dwelling units or 0.0220 H_{impact} in Tier 1 on Big Pine and No Name keys, whichever results in a lower “H”. A total of 20 ROGO allocations have been awarded to date in Tier 1 on Big Pine Key and No Name Key. Five of these allocation awards had issued permits that subsequently received certificates of occupancy with a resulting combined H_{impact} of 0.0107. There is one active allocation with a potential H of 0.0005, but the associated building permit had not been issued by 12/31/24.

SUMMARY OF H-IMPACT FOR TIER 1 PERMITS AND ALLOCATIONS					
RE#	Permit #	Issue Date	H Value	H Impact	Tier

00319494-001400	96101473	Allocation award expired 7/22/2015	0.0023	0	1
00319494-000300	96101462	Allocation award expired 1/30/2016	0.0026	0	1
00319494-000200	96101461	Allocation award expired 1/30/2016	0.0022	0	1
00319494-000100	96101460	Allocation award expired 1/30/2016	0.0043	0	1
00319494-000600	96101465	Allocation award expired 1/30/2016	0.0026	0	1
00319494-000700	96101467	Allocation award expired 9/05/2016	0.0034	0	1
00319494-000800	96101468	Allocation award expired 9/05/2016	0.0025	0	1
00319494-001100	96101471	Allocation award expired 9/05/2016	0.0027	0	1
00285660-000000	05105438	Allocation award expired 9/26/2019	0.0024	0	1
00295360-000000	05104831	9/10/2020	0.0033	0.0033	1
00289430-000000	SFDUP-2024-0158	Allocation awarded 11/3/2024	0.0005	0.0005	1
TOTAL H-IMPACT FOR ISSUED BUILDING PERMITS				0.0107	
TOTAL H-IMPACT FOR ISSUED ALLOCATIONS				0.0005	
H-IMPACT OF ISSUED PERMITS + ALLOCATIONS				0.0112	

Fourteen of the awarded but unused allocations for Tier 1 parcels have expired (see table above). Therefore, the total amount of used and active allocation “H” is 0.0112 which leaves 0.0108 “H” (0.0220 “H” - 0.0112 “H”) remaining of the total amount allowed by the ITP. The number of issued building permits and the remaining H_{impact} are both well under their respective maximum limits. There are two Tier 1 applications currently competing in ROGO for parcels with a combined “H” value of 0.0018.

In order to address the potential for having insufficient Tier I allocations to meet demand prior to the expiration date of the ITP (2026), the Monroe County Board of County Commissioners adopted Comprehensive Plan Policy 101.6.2 and amended Section 138-24 (Residential ROGO Allocations) to limit the annual maximum number of residential permit allocations awarded in Tier I on Big Pine Key and No Name Key to be no more than one (1) every 2 years.

Clearing of native habitat:

The Incidental Take Permit allows clearing of native habitat provided it is limited to parcels to be developed for residential use or for local road widening. The total amount of clearing over the 20-year life of the HCP is limited to no more than 7 acres. No clearing of native habitat, other than that necessary and authorized for new residential development, local road widening, or fire breaks to protect residential areas will be allowed. All other development is restricted to lands already

disturbed. Since the ITP was issued on June 9, 2006 through December 31, 2024, 0.36 acres (15,706 square feet) of native land clear has been authorized associated with the following SFR permits:

Permit #	Issue Date	Land Clear (sq. ft.)	Land Clear (acres)
03102339	1/25/2007	2,200	0.05
06101006	7/3/2014	2,212	0.05
07102237	12/15/2016	2,652	0.06
17105192	10/16/20	4,153	0.10
12100011	07/08/22	4,489	0.10
TOTALS:		15,706	0.36

XXII. UPDATED MASTER LIST OF ALL DEVELOPMENT PERMITTED ON BIG PINE KEY AND NO NAME KEY

The HCP Development Permit Master List is attached as Appendix II. The “H” balance reflected in this 19th Annual Report is the cumulative H_{impact} from all impacts occurring from March 13, 1995 through December 31, 2024. The H-value remaining for impacts is calculated as follows:

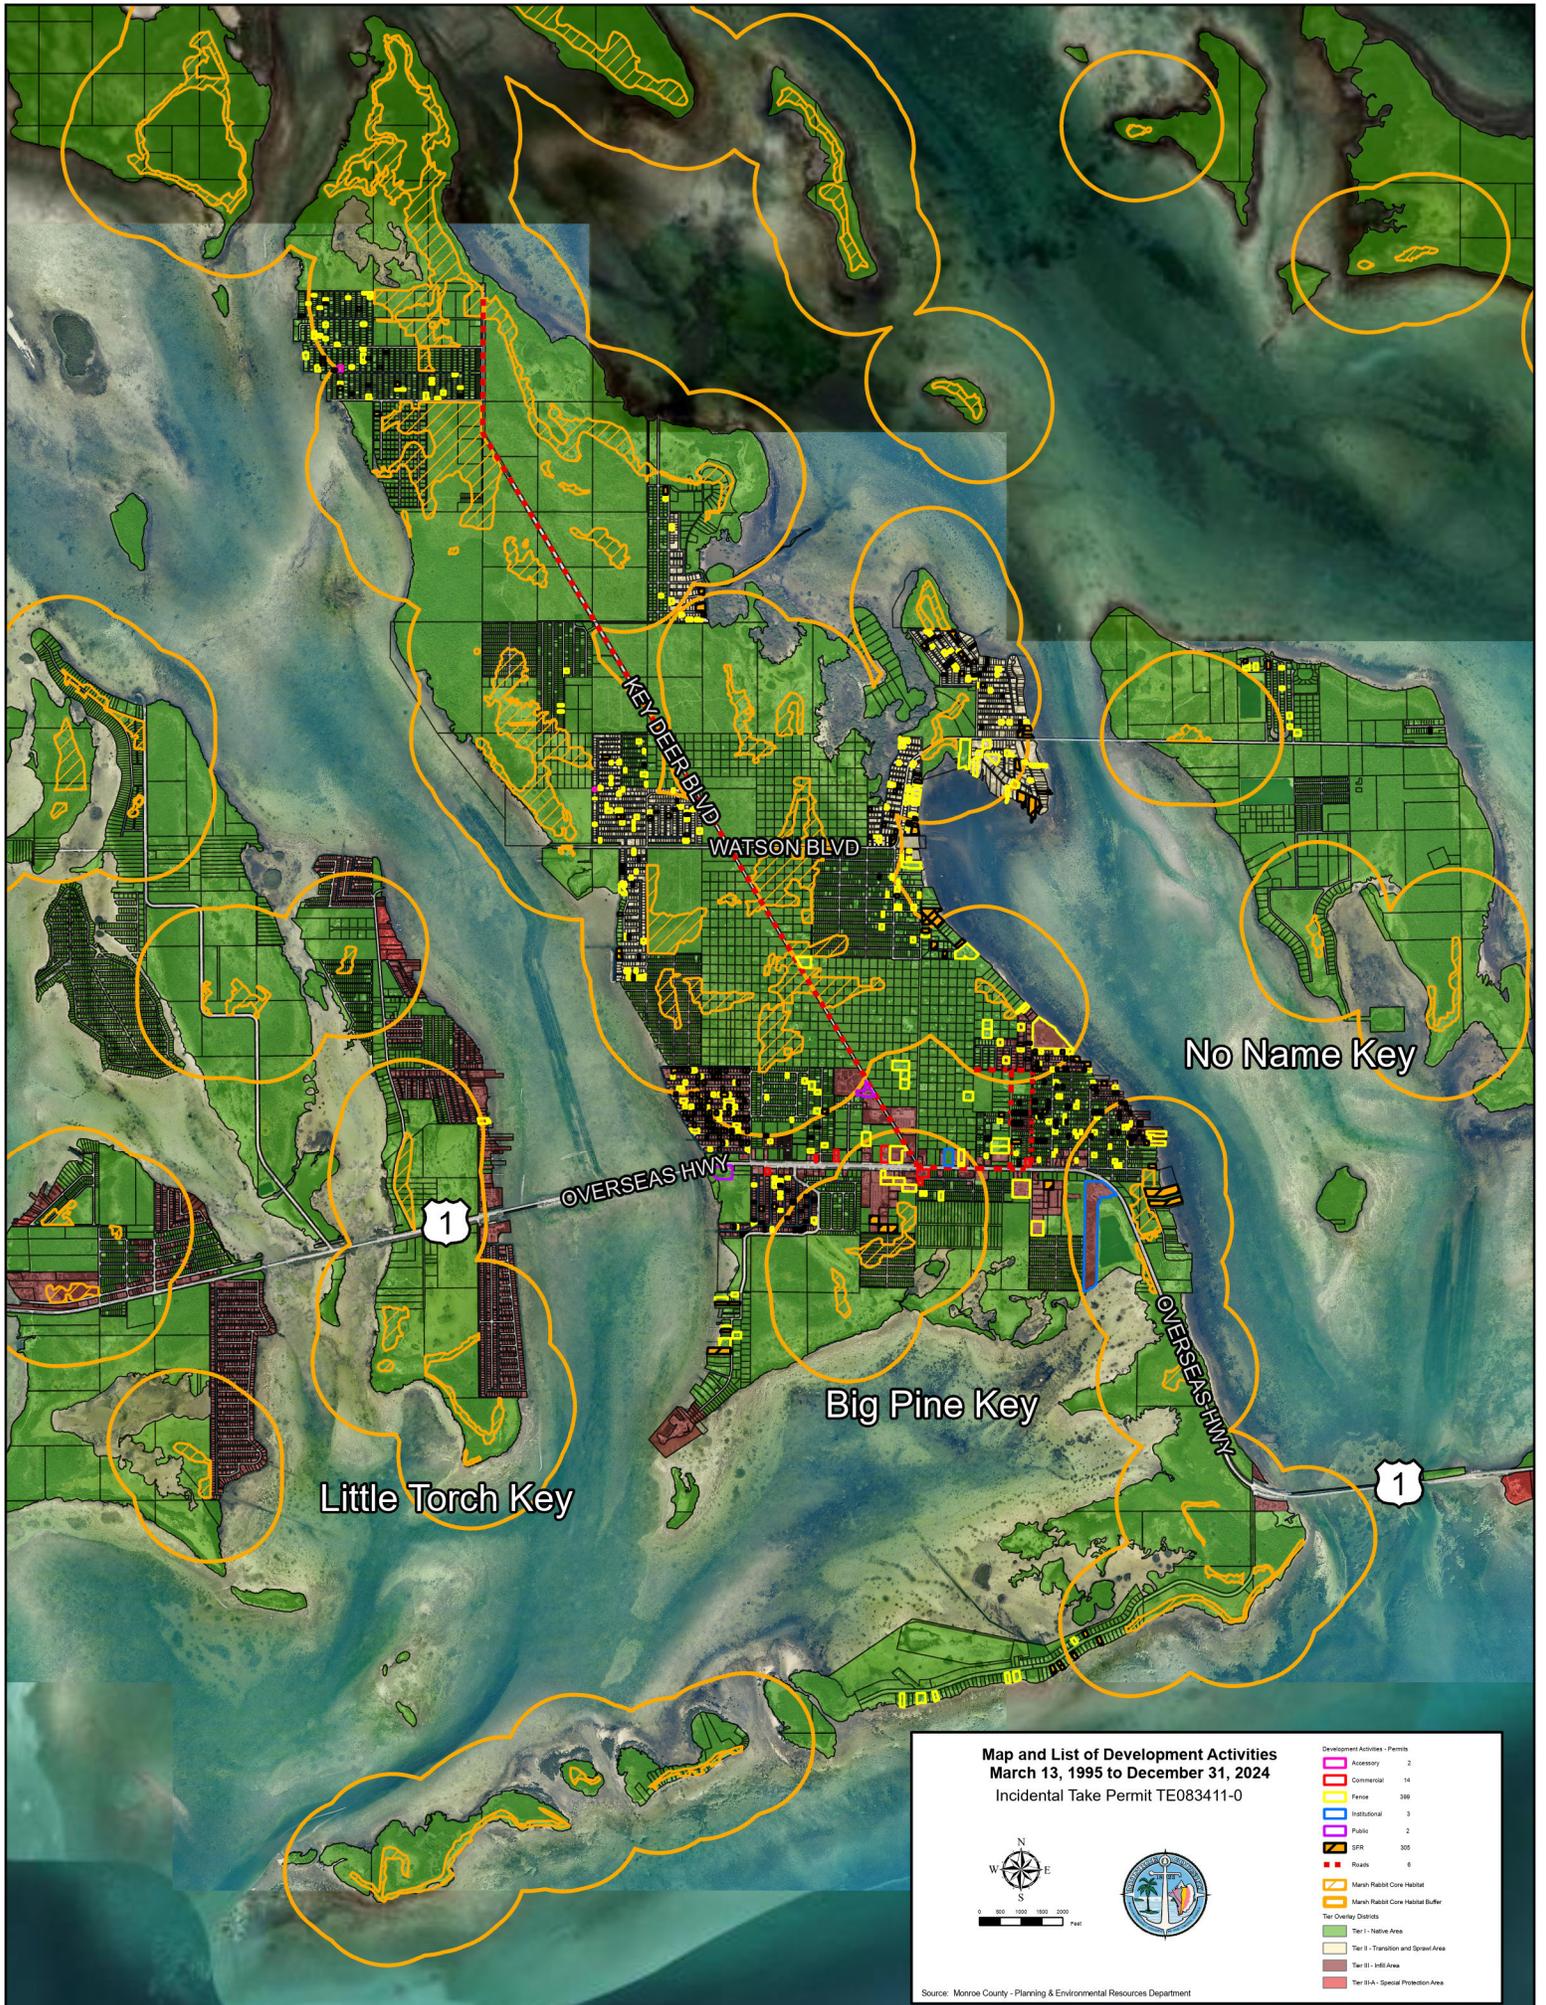

- Maximum H-value allowed for impacts 1.1000
 - Cumulative H_{impact} for all approved permits from March 13, 1995 through December 31, 2024 -0.5736
- Remaining “H” available for development impacts: 0.5264

For the allowed 1.1000 H_{impact} for development, Monroe County is required to mitigate “H” on a 3:1 basis with “H” credits through land acquisitions or dedications. The mitigation required for the current level of development is 1.7208 “H” ($0.5736 H_{\text{impact}} \times 3$). The County currently has 3.2782 “H” mitigation credits, which is 1.91 times the amount presently required. Thus, the mitigation “H” satisfies the ITP requirement that the cumulative H-value of lands acquired as mitigation does not lag more than five percent behind what is necessary to fully mitigate the cumulative H_{impact} .

Appendix I

Mitigation Lands
Invasive Exotic Vegetation Status Report

Monroe County Mitigation Lands Invasive Exotic Vegetation Status Report

March 2025

As required by

Incidental Take Permit # TE083411-0

Prepared by

Beth Bergh

Monroe County Land Steward

This report has been prepared in accordance with Requirement # 19, Block 11: K of Incidental Take Permit (ITP) # TE083411-0 which requires Monroe County to submit “A *monitoring report documenting compliance with the exotic / nuisance plant control program on county conservation lands, demonstrating no more than 20 percent aerial coverage of nuisance and 10 percent aerial coverage of invasive species identified by Florida Exotic Pest Plant Council (now Florida Invasive Species Council).*”

There are a total of 1,447 parcels that comprise the mitigation lands under Monroe County’s Habitat Conservation Plan (HCP). These lands are managed by the Monroe County Land Steward and, in some instances, the US Fish and Wildlife Service Key Deer Refuge staff. A total of 145 parcels are located on No Name Key and the remaining 1,302 parcels are on Big Pine Key. The following table shows the breakdown of the mitigation parcels by subdivision:

Key	Subdivision	Number of Parcels
No Name	Bahia Shores	9
No Name	Ocean Heights	31
No Name	Tuxedo Park	58
No Name	Other	47
Big Pine	Cahill Pines & Palms	35
Big Pine	Doctor’s Arm	49
Big Pine	Eden Pines	154
Big Pine	Kinercha	83
Big Pine	Koehns	9
Big Pine	Long Beach Estates	20
Big Pine	Palm Villa	201
Big Pine	Pine Crest	38
Big Pine	Pine Grove	26
Big Pine	Pine Heights	127
Big Pine	Pine Key Acres	44
Big Pine	Port Pine Heights	59
Big Pine	Sands	153
Big Pine	Sea View Estates	30
Big Pine	Silas Knowles	49
Big Pine	Tropical Park	72
Big Pine	Wickfield Acres	20

Big Pine	Other	133
	TOTAL	1,447

As illustrated in the table above, a large majority of the mitigation parcels are located in residential subdivisions with the greatest number of properties situated in Palm Villa, Eden Pines, and Sands Subdivisions, respectively. The typical subdivision lot measures approximately 50 ft x 100 ft. The size and the location of these lots create unique land management challenges, such as increased edge effect and potential for encroachment from neighboring residences.

Site visits were conducted and aerial photo interpretation was used to determine the level of infestation of invasive exotic vegetation. For the purposes of this report, an “invasive exotic plant” is one that is listed on the Florida Invasive Species Council’s (formerly “FLEPPC”) list as either a Category I or a Category II species. The percent cover of invasive exotics was classified as follows:

Level of Infestation	% Cover of Invasive Exotics
0	Not present
1	Less than 10 %
2	10-20%
3	20-50%
4	50-75%
5	75-100%

The complete parcel-by-parcel results of the survey may be found in the attached spreadsheet titled “Monroe County Mitigation Lands”. The results are summarized as follows:

Level of Infestation	Number of Parcels
0	1,217
1	216
2	14
3	0
4	0
5	0

A total of 14 parcels were found to have invasive exotic infestation level greater than 10 percent. These parcels comprise approximately 1.0 percent of the total number of parcels (1,447).

Monroe County continues to make progress on the eradication of exotics throughout the Big Pine and No Name Key area. Over the past several years, the County has hired contractors to conduct invasive exotic removal projects on approximately 20+ lots on Big Pine Key. The invasive exotic removals were followed by site cleanup and native vegetation planting as needed. Additional invasive exotic removal projects are planned for the coming years, subject to available funding.

The Monroe County Land Steward, Assistant Land Steward, and the County’s contracted team of Invasive Exotic Plant Technicians continue to monitor and treat invasive exotic plant species on Monroe County Mitigation Lands.
