RE: HCP/ITP Requirements

Dear Mr. Dennis,

The Federal Fish and Wildlife Incidental Take Permit #TE083411-0 requires the County to provide an annual report for each of the 20 years of the permit. Enclosed please find Monroe County's 1st Annual Report for the period of June 9, 2006 to December 31, 2006.

Should you have any questions or comments, do not hesitate to contact me. Thank you for your patience.

Sincerely,

Andrew Omer Trivette
Director, Growth Management Division

Enclosure

CERTIFICATION

Pursuant to Block 11, K of Incidental Take Permit No. TE083411-0, the following
certification is made:

Under penalty of law, I, , certify that to the best of my knowledge, after appropriate inquiries of all relevant persons involved in the preparation of this report, the information submitted is true, accurate, and complete.

1ST ANNUAL REPORT

REPORTING PERIOD: MARCH 13, 1995 TO JUNE 8, 2006
REPORTING YEAR 1: JUNE 9, 2006 TO DECEMBER 31, 2006

This report complies with the terms and conditions of Block 11 K of Incidental Take Permit No TE083411-0.

The Incidental Take Permit as well as development activity runs for 20 years from June 9, 2003 to June 9, 2023. The "Reporting Period" is the period from March 13, 1995 to June 8, 2006. The "Reporting Year 1" is the period from the start of the Incidental Take Permit, June 9, 2006 to the end of the current year or December 31, 2006. Items counted over the 20-year period include county acquired parcels, number of fence permits, single family residential developments and commercial developments.

The original Habitat Conservation Plan was proposed for a 20-year period, but 29 single family residences (Table 1) were developed prior to the start of Reporting Period 1. Recognizing this use might result in using up the remaining residential development capacity before the end of the permit period, the County and Service agreed to make the permit duration 17 years. The date of the permit issuance is June 9, 2006. The total H impact for the 29 permits is 0.0371H and has been recorded into the H Bank.

Based on Monroe County's review of all documents (submitted with this report), the County is confident in the accounting of the H values with regards to documenting all occurrences of credits (acquired lands) and debits (developments) in Big Pine and No Name Keys for the Reporting Period and Reporting Year 1.

This space left intentionally blank.

Biological Information

1. Results of the Key deer census, including the calculation of the average number of deer seen.

Average road-count = 68.1 (12 counts, June to December, including 6 'USFWS Fall' counts); (Average count for full 12-month year = 71.1)

The Key deer census value is the average count derived from multiple road counts. The value normally reflects the average of road counts from a full year, including monthly counts plus several Fall counts (called USFWS Fall counts) that are conducted in the same manner. For the period June 9 to December 31, 2006, the census value was 68.1. This value was derived from 12 standardized road counts between June and December 2006, including 6 'USFWS Fall' counts. Key deer census and average road count are hereafter used interchangeably. The average road count for the entire year, 71.1 deer, was similar to that for the abbreviated period (June to December) necessarily assessed for purposes of reporting on the HCP for 2006. The average census value for 10 years ending in 2006 was 59.0. Accordingly, the 2006 values were up (about 19 percent) from the 10-year average.

However, few conclusions can be drawn from this single data point. The road counts do confirm that there was no catastrophic loss due to Hurricane Wilma (October 2005), and suggest that any direct loss that did occur was very low. FWS mortality records for 2005 are consistent with that observation. Effects from Hurricane Wilma may potentially be manifested over some longer time-frame. (Source: Florida Key Deer Refuge, USFWS)

2. A summary of Key deer mortality information, including the calculation of the number of human-related deaths. Human-related deaths include those due to road kills, entanglement, attacks from domestic predators, and poaching.

In 2006, there were 57 human related Key deer deaths between June 9th and December 31st, and a total of 66 deaths were documented. Human related Key deer deaths included drowning in pools and canals (n=3) and road kills (n=54). No entanglements, poaching, or other human caused deaths were detected. Road-kills accounted for 82 percent of all known mortalities after June 9th, including those in which the cause was not determined. The 57 human related Key deer deaths accounted for 86 percent of all known mortalities. The proportion of all known deaths that were due to road-kills and human-causes overall, were higher than corresponding values for the preceding 10 years (1997-2006 average), approximately 70 percent and 77 percent, respectively. The substantially higher values for the 2006 period discussed may be partly due to the reporting period, which covers only about half of the year. The values for the road-kill and total human cause portions for all of 2006 are 78 percent and 83 percent, respectively. Those values were 8 and 6 percentage points, respectively, higher than the corresponding averages from 1997 to 2006.

Along US 1, mortalities remained low in the project area (fenced area, east side of Big Pine Key). Mortalities increased along two stretches of US 1 outside of the project area. Total mortalities increased somewhat. Overall, however, the changes in annual death rates along US 1 appear to be proportionate with what would be expected given the road count values (and accordingly, total mortalities).

Summary of Key deer mortality

June 9 to December 31, 2006: 66 total; 57 human-caused

Human-caused shown in **bold**

	Combat	Disease	Dog	Drowning	Entangl.	Poached	Misc	Roadkill	Undet.
Big Pine (N=63)	0	1	0	3	0	0	0	51	8
No Name (N=3)	0	0	0	0	0	0	0	3	0
Totals (N=66)	0	1	0	3	0	0	0	54	8

(Source: Florida Key Deer Refuge, USFWS)

3. *A discussion and interpretation of mortality data.*

Many of the deaths for which the cause was attributed to “undetermined”, and likely even disease deaths, undoubtedly include a significant number of cases that would actually be attributed to human-related deaths, road kills in particular.

Road kills remain the greatest source of mortality to key deer. Roadside feeding may exacerbate threats to a subset of Key deer associated with vehicle collisions. However, we believe that roadside feeding has been gradually, but progressively, declining over the years and that roadside feeding only increases the probability of risk within a subset of the overall population. Within the last decade, public education and law enforcement has apparently reduced the prevalence of roadside feeding. Further research on this topic would be useful, especially since available publications differ in the level of importance attributed to roadside/tourist feeding versus various levels of feeding at residences. However, we are not aware of published evidence that roadside feeding itself is a major contributor to road kills. The overall impacts of feeding, which may directly or indirectly influence road kills to some degree, are likely much more complex, and more profound with respect to broader changes in patterns of Key deer social behavior, movement, nutrition, dispersion, and possibly genetics. The Service has indicated an interest in developing long-term, holistic plans to ensure that feeding continues to decline or be eliminated. Recognizing that we all have a responsibility, jointly and severally, for this and other factors that impact Key deer recovery potential, the County intends to collaborate on any such expanded program. As it is, law enforcement support and passive education ensue. (Source: Florida Key Deer Refuge, USFWS)

4. *A summary discussing habitat management activities for County lands.*

The Monroe County Land Steward is responsible for managing all of the County's conservation lands, including the County's mitigation properties on Big Pine Key. Over the past year, the Land Steward has conducted numerous invasive exotic plant removal projects, site cleanups and one native planting on County mitigation properties within the Big Pine Key planning area. Work sites included lots within Eden Pines, Doctors Arm, and Sands Subdivisions. Site work was done by independent contractors and/or Monroe County Public Works.

Additionally, the Monroe County Invasive Exotic Plant Technicians continue to monitor these and other mitigation properties to ensure that the sites remain free of invasive exotic plant species.

5. *An assessment of whether the ratio of the number of human-related deaths to average deer seen remains below 1.53.*

$$\text{Ratio} = \frac{\text{human-related deaths}}{\text{average deer seen}} = \frac{57}{68.1} = 0.84$$

The ratio of the number of human-related deaths to average number of deer seen (0.84) was below 1.53. (Source: Florida Key Deer Refuge, USFWS)

6. *A compilation (in acres) of annual impacts to the 500-meter wetland buffer areas identified as important for Lower Keys marsh rabbit.*

For the reporting year, June 9, 2006 to December 31, 2006, 0.43 acres of fence permits impacted the 500-meter wetland buffer areas. These permits are all within the green zone.

7. *The cumulative impacts of all development projects affecting buffers since permit issuance for Lower Keys marsh rabbit.*

Since permit issuance, June 9, 2003 to the end of the reporting year or December 31, 2006, 20.55 acres of development permits impacted the 500-meter wetland buffer areas. All development is within the green zone.

8. *A summary of reported Lower Keys marsh rabbit road mortality.*

No documented cases of marsh rabbit road mortality were obtained. In 2006, the occurrence of at least one road kill on Big Pine Key was verbally reported by a local naturalist(s), but not otherwise substantiated. (Source: Florida Key Deer Refuge, USFWS)

9. A compilation and report of entire project area impacts (in acres) to document possible effects on indigo snakes.

Since permit issuance, June 9, 2003 to the end of the reporting year or December 31, 2006, 0.43 acres of fence permits impacted the entire project area to document the possible effects on indigo snakes.

REAL ESTATE NUMBER	PERMIT NUMBER	ISSUE DATE	H VALUE	20% H Impact
00293790-000000	6104187	7/28/2006	0.0007	0.00014
00316670-000000	6106694	12/7/2006	0.0028	0.00056

10. A list and map of development activities approved and completed.

Reporting Year 1: June 9, 2006 to December 31, 2006

Map 1, Table 2: Fence Permits

Table 4: Commercial Development (Roads)

11. The H value associated with each activity and the total H value of all activities for the year June 9, 2006 to December 31, 2006.

Total H value of all development activities for Reporting Year 1, June 9, 2006 to December 31, 2006:

Fence Permits: 0.0007H

Single Family Residential Development: 0H

Commercial Development: 0.0158H

Total H value of all activities for Reporting Year 1 is 0.0165H

12. The cumulative H value of all development since permit issuance.

Fence Permits: 0.0313H

Single Family Residential Development: 0.0308H

Commercial Development: 0.0158H

Total H value of all activities since permit issuance is 0.2613H

13. A discussion of observations made during construction monitoring of county facilities and road expansion activities.

The permittees made no observation of direct or incidental take of Key deer during construction monitoring of County facilities and road expansion activities.

14. A list and map of parcels acquired as mitigation in the reporting year (June 9, 2006 to December 31, 2006).

Reporting Year 1: June 9, 2006 to December 31, 2006

Map 3, Table 5: Acquisitions

15. *The H value for each parcel and the total H value of parcels acquired as mitigation during the reporting period (June 9, 2006 to December 31, 2006).*

The total H value of parcels acquired for Reporting Year 1, June 9, 2006 to December 31, 2006 is 0.0028H

16. *The cumulative H value of all land parcels acquired as mitigation since permit issuance.*

The total H value of parcels acquired since permit issuance is 1.4267H.

17. *A discussion of management activities conducted during the reporting year.*

The Monroe County Land Steward is responsible for managing all of the County's conservation lands, including the County's mitigation properties on Big Pine Key. Over the past year, the Land Steward has conducted numerous invasive exotic plant removal projects, site cleanups and one native planting on County mitigation properties on Big Pine Key. Work sites included lots within Eden Pines, Doctors Arm, and Sands Subdivisions. Site work was done by independent contractors and/or Monroe County Public Works. Additionally, the Monroe County Invasive Exotic Plant Technicians continue to monitor these and other mitigation properties to ensure that the sites remain free of invasive exotic plant species.

18. *An assessment of the status of all mitigation parcels, addressing the extent of invasion by exotic species, trash disposal, and other potential human-related impacts.*

There are approximately 900 mitigation parcels on Big Pine Key. Many of these parcels are individual lots within developed subdivisions. This situation creates a large amount of edge effect between developed parcels and the subject mitigation lands. These effects can include the constant threat of invasive exotic plant invasion and the potential for dumping and encroachment by the residents. The Monroe County Land Steward is working to address these management issues by conducting invasive exotic removal projects, noticing residents of encroachment issues and working with Monroe County Public Works to clean up any dumping. Additionally, the Land Steward is creating an informational brochure for homeowners that will provide information regarding invasive exotic plant species, native plants and the proper disposal of landscape debris.

19. *A monitoring report documenting compliance with the exotic / nuisance plant control program on county conservation lands, demonstrating no more than 20 percent aerial coverage of nuisance and 10 percent aerial coverage of invasive species identified by Florida Exotic Pest Plant Council.*

Since permit issuance, numerous invasive exotic removal projects occurred on the mitigation parcels on Big Pine Key this past year. Specifically, in cooperation with the

National Key Deer Refuge and The Nature Conservancy, projects were completed in the following subdivisions: Eden Pines; Palm Villa; Kinercha; Pine Key Yacht Club; Koehn's; Doctor's Arm; Sands; and Cahill Pines & Palms. Additionally, the Monroe County Invasive Exotic Plant Technicians worked to maintain areas free of invasive exotics and nuisance vegetation. The only remaining area containing a substantial amount of invasive exotic plant species is Sands Subdivision. However, the mitigation lands within Sands Subdivision are slated for an invasive exotic removal project within the upcoming year.

Monroe County Planning and Environmental Resources Department is in receipt of the Florida Keys Invasive Exotic Task Force field maps, dated February 26, 2007, depicting percent coverage information for nuisance and invasive exotic vegetation for Big Pine and No Name Keys. (Appendix: FNAI Maps). These maps are in the process of being digitized which will allow accurate assessments of mitigation parcels, documenting compliance with the exotic / nuisance plant control program on County conservation lands. This item can be more clearly addressed in a subsequent report.

20. *A statement confirming that mitigation has occurred as to maintain a 3H:1H ratio with respect to development activities and demonstrating that the cumulative H value of lands acquired as mitigation does not lag any more than 5 percent behind what is necessary to fully mitigate the cumulative H value of impacts authorized through the reporting period.*

3H:1H mitigation to impact ratio

The cumulative H value of lands acquired as mitigation since March 13, 1995 through the end of the reporting period, December 31, 2006 is 1.4267H.

The cumulative H value of parcels impacted by development activities, at the 3:1 ratio, since March 13, 1995 through the end of the reporting period, December 31, 2006 is 0.2613H. Total impact at 3:1 mitigation is $0.2613H \times 3 = 0.7838H$

The ratio of mitigation H (acquired lands) to H impact (from development activities) is:
 $1.4267H / 0.7838H = 1.8203H:1H$.

5% lag in meeting mitigation requirements

$$\begin{aligned}\%lag &= 1 - [H \text{ value mitigated} / (3 \times H \text{ value impacted})] \\ &= 1 - [1.4267H / (3 \times 0.2599H)] \\ &= 1 - [1.4267H / 0.7838H] \\ &= 1 - 1.8203 \\ &= -0.8203 \\ &= -82.03\% \text{ is less than } 5\%\end{aligned}$$

The permittees are not lagging behind in the 3H:1H mitigation requirement by more than 5%.

Statement of confirmation

The permittees confirm that mitigation has occurred as to maintain a 3H:1H ratio with respect to development activities and demonstrates by the calculations above that the cumulative H value of lands acquired as mitigation does not lag by more than 5 percent allowed to fully mitigate the cumulative H value of impacts authorized through the reporting period.

21. Any other pertinent information relative to the implementation of the HCP.

There have been three (3) residential permits with a total H value of 0.0062H issued in Tier 1 for Big Pine and No Name Keys since permit issuance of June 9, 2003.

New residential development in Tier 1 areas will be limited to no more than five percent of all residential units permitted over the 20-year period (i.e., a maximum of 10 units) or a total H = 0.022 (two percent of the total H), whichever results in a lower H (HCP, 5.3.2 Avoidance and Minimization, #4). The total H for the 3 Tier 1 residential permits is 0.0062H or 0.795% of the total H.

Real Estate Number	Permit Number	Permit Issuance Date	H Impact
00270490-000000 Tier 1	SFR 96-1-0807	5/4/2004	0.0012
00285550-000000 Tier 1	SFR 96-1-0971	6/1/2005	0.0028
00289510-000000 Tier 1	SFR 97-1-0593	5/1/2006	0.0022
Total H Impact			0.0062

Road widening and paving of existing roads since March 13, 1995 to the date of permit issuance were reviewed by the County and the Service; many of these projects were not undertaken. Of those completed, none were determined to have caused habitat loss nor believed to substantially increase the risk of Key deer mortality. These road projects were not counted toward the cumulative H impacts.

The 266 fence permits (Table 6) cited in the Habitat Conservation Plan, Table 5.2 have an H impact value of 0.1118H. The County analyzed the 266 fence permits. Of the 266 permits, 107 fence permits were deleted from the H bank (Table 7). Eighty-nine (89) of the 107 fence permits were not included in the H Bank because the property was already developed. Due to Action Item 8.1.1e of the Livable CommuniKeys Plan which states: "Regulate new fences as follows: do not consider fencing of developed property in Tier II or III (whether developed with principal or accessory uses) to have H impact additional to

the development as modeled in the HCP as a reduction in K" the H value will not be counted. Another eight (8) fence permits were issued prior to the baseline of March 13, 1995, three (3) were fence replacement permits and seven (7) fence permits were counted twice. This leaves a balance of 158 fence permits with an H impact of 0.0657 to be counted in the H bank.

As land acquisition becomes scarcer, it may become more difficult to maintain the 3:1 ratio.

In 1997, one 2,246 square foot office (RE#: 00275660-000000) was constructed adjacent to, but not in the commercial corridor. It was constructed on a disturbed parcel of 0.24 acres. The parcel was previously scarified as the site of a horse stable. No native vegetation was removed as a result of the subsequent development.

In the context of this report, native habitat includes the following: hammock, ridge hammock, pineland, fresh water wetland and salt marsh / buttonwood wetland.

In 1995, 40% of low quality pineland was cleared in conjunction with development of a single family residence. This equates to 0.00573 acres of clearing. (RE#: 002079180-000000, permit # 95100415)

22. *Monroe County will prepare and maintain an updated master list of all development permitted on Big Pine Key and No Name Key with the start date of March, 13, 1995, which records the H value for each permit approval and a running total, which is cumulatively subtracted from the total H value. This master list shall be readily available to the public, the Service, and the DCA.*

The master list of all development has been added as Table 8. Florida has a very broad public records laws. Most written communications to or from the County regarding County business are public record, available to the public and media upon request. All reports and corresponding data will be published to the Monroe County web site: <http://monroecofl.virtualltownhall.net>.

The H balance reflected in this 1st Annual Report covers all occurrences of impacts dated from March 13, 1995 to December 31, 2006. The H value remaining for impacts:

Total H value allowed for impacts	1.100 H
Total of cumulative H value from <u>March 13, 1995</u> <u>through December 31, 2006</u>	- 0.2613H
Remaining H value available for development impacts	0.8387H

The H value of the acquired parcels is 1.4267H; conversely, the H impact of developed parcels is 0.613H, leaving a balance of 0.8387H in the H Bank. These numbers are in compliance with the allowed 5% lag as well as the 3:1 development mitigation requirements.

In summary, low population numbers, development pressures, habitat loss, and threats from hurricanes are some of the factors in deeming the Key deer, the Marsh Rabbit and the Indigo Snake as endangered species. During Reporting Period 1, June 9, 2006 to December 31, 2006, 66 total Key deer mortalities were document of which 57 were caused by humans.

During the Reporting Period of March 13, 1995 to the end of Reporting Period 1, December 31, 2006 a total of 79.96 acres have been developed within the Marsh rabbit buffer. This includes 21.48 acres of commercially developed property, 48.75 acres of fence development and 9.73 acres of single family residential development.

Monroe County finds through its actions, after carefully reviewing and analyzing the above documents, in the timeframe of Reporting Period 1 of June 9, 2006 to December 31, 2006, is in compliance within the limits of the Incidental Take Permit #TE083411-0.
